TO WHOMSOEVER IT MAY CONCERN

Rain water Harvesting Maintenance Report

The Narayana College of Nursing, Nellore, has installed 8 (eight) rain water harvesting areas in the around College and Hostel campus building. After every rain the rain water area will be cleaned and harvested. The diversion bunds across the stream are made by piling up stones and then lining them with leaves and mud to make them leak proof. The channel maintained constantly.

MAINTENANCE OF WATER BODIES AND DISTRIBUTION SYSTEM

IN THE CAMPUS

A well equipped water distribution system is maintained in the institution. The main source of water in the college is through bore well and there are 3 bore wells in the campus. The water is stored in 3 syntax tanks and each tank's capacity is 2000 liters. These tanks will be cleaned once in a month. Two RO plants are in operation in the institution and its filter will be cleaned once in a week. Bore well water is distributed through pipe connection to each floor and supplied for 24hours a day.

RAIN WATER HARVESTING

Rain water harvesting is being practiced in the college campus. In campus, there are 3 main buildings and in each building 2 water plants are planned and altogether 6 rain water plants are under construction. Total rooftop and surface area for the 3 main buildings is 28,510 sq m. Average annual rainfall in Nellore is 984mm/ 38.7 inch per year. Two RO plants are in operation and each recycle around 2000 L/day.
