ACADEMIC YEAR 2021-2022

2.6.1 - OUTCOME ANALYSIS OF POS AND COS

The Institute has clearly stated program outcomes (POs) and course outcomes (COs) for its all-academic programs and courses department-wise. The faculty and students know the learning outcomes at the beginning of the academic session. Course outcomes and objectives are printed in the syllabus of each subject. The course outcomes are mapped to the program outcomes.

Analysis of Program outcomes is achieved by evaluation methods- formative and summative assessment. The students maintain log books. The students and teachers have an academic calendar wherein planning is done for the entire curriculum, providing all the learning objectives and outcomes at various levels. The faculty is trained in teaching and learning objectives and outcomes in their training programs conducted by Narayana College of Nursing. The College regularly monitors the students' performance in internal examinations, viva voice, and University examinations. At the College level, IQAC has an apex role in monitoring and reforming all the teaching-learning and assessment strategies.

Each department conducts extra/remedial classes for slow learners. The Institution has a well-structured feedback mechanism system in place. The feedback is obtained from all the stakeholders like students, teachers, Employers, Alumni and professionals regarding the curriculum and each department's teaching-learning assessment, etc. Critically evaluating the quality and impact of its work during and after its implementation is a part of organizational strategy.

Principal
NARAYANA COLLEGE OF NURSING
Chinthareddypalem,
NELLORE - 524 003

The feedback received is analysed at the departmental level and central levels. After analysis, corrective actions are initiated and constantly monitored.

Both direct and indirect methods of assessment of learning outcomes are being implemented. The direct methods include tests, presentations, lab work, student projects, seminars, Problem- Based-Learning, Journal clubs, quizzes, assignments, portfolios, logbooks for students' work, competitive exams, multiple choice questions (MCQs), objective structured clinical examination (OSCE), short and long case assessment, simulators, peer assessment etc. The indirect method includes surveys, such as student feedback, employers or Allumini job placement rates, and self-evaluations.

The Institution has formulated course outcomes to make the students more competent in all domains of learning (Cognitive, Affective and Psychomotor domains). Accordingly, their learning assessment is formative at the department level and summative at the university level.
