HOME REMEDIES FOR BACK PAIN

What are the causes of back

pain?

- ✓ Low back pain is caused by injury to a muscle (strain) or ligament (sprain).
- ✓ Common causes include improper lifting, poor posture, lack of regular exercise
- ✓ Often, the only symptom is pain in the lower back.

COMBATING WORK-RELATED
BACK PAIN
NATURALLY & EFFECTIVELY

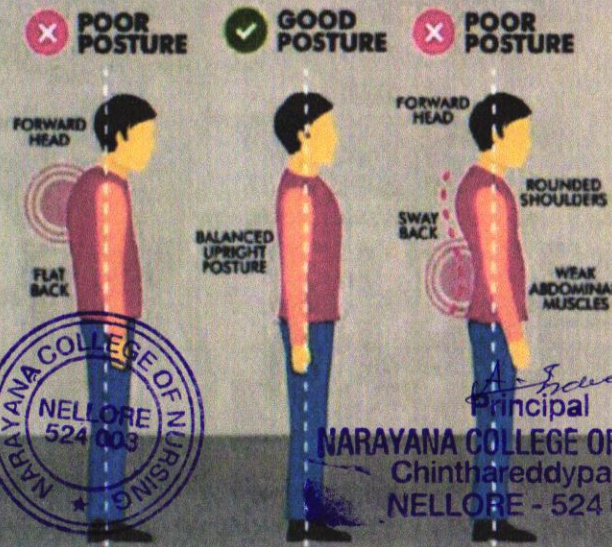

Exercise helps my back. If I don't exercise, that's when it starts to hurt. The pain is a good motivator to run and exercise.

Osteoarthritis

- ❖ OA is more common in women than men,
- ❖ But the prevalence increases dramatically with age.
- ❖ OA of the knee is a major cause of mobility impairment, particularly among females.

A normal knee joint

HOME EXERCISES

Thigh muscle (quadriceps) exercises

Straight-leg raise (sitting)

Sit well back in the chair with good posture. Straighten and raise one leg. Hold for a slow count to 10, then slowly lower your leg. Repeat this at least 10 times with each leg. If you can do this easily, try it with light weights on your ankles and with your toes pointing towards you. Try doing this every time you sit down.

Straight-leg raise (lying)

Bend one leg at the knee. Hold the other leg straight and lift the foot just off the bed. Hold for a slow count of 5, then lower. Repeat 5 times with each leg. Try doing it in the morning and at night while lying in bed.

Leg stretch

Sit on the floor with your legs stretched out in front. Keeping your foot to the floor, slowly bend one knee until you feel it being comfortably stretched. Hold for 5 seconds. Straighten your leg as far as you can and hold for 5 seconds. Repeat 10 times with each leg.

Leg cross

Sit on the edge of a table or bed. Cross your ankles over. Push your front leg backwards and back leg forwards against each other until the thigh muscles become tense. Hold for 10 seconds, then relax. Switch legs and repeat. Do 4 sets with each leg.

Sit/stands

Sit on a chair. Without using your hands for support, stand up and then sit back down. Make sure each movement is slow and controlled. Repeat for 1 minute. As you improve, try to increase the number of sit/stands you can do in 1 minute and try the exercise from lower chairs or the bottom two steps of a staircase.

Step ups

Step onto the bottom step of stairs with the right foot. Bring up the left foot, then step down with the right foot, followed by the left foot. Repeat with each leg until you get short of breath. Hold on to the bannister if necessary. As you improve, try to increase the number of steps you can do in 1 minute and the height of the step.

Knee squats

Hold onto a chair or work surface for support. Squat down until your kneecap covers your big toe. Return to standing. Repeat at least 10 times. As you improve, try to squat a little further. Don't bend your knees beyond a right angle.

- ❖ Living with osteoarthritis is a balancing act: an exploration of patients' beliefs about knee pain

ON ONE HAND...

1. Impact during activity wears out my knee
2. There is activity that I'm told is good for my knees
3. I want to make the most of my active life while I still can
4. I would rather ignore my knee
5. Medication helps my pain
6. I need to keep going

ON THE OTHER HAND...

1. Activity is good for me
2. There is activity that is right for me (and activities good for the knees are often not right for me)
3. I do not want to wear my knee out faster
4. I need to plan my life around my knee
5. Medication does not fix my knee
6. I need to rest and pace

THE VERY BEST
THING
YOU CAN DO
FOR THE WHOLE WORLD
IS TO MAKE
THE BEST
OF YOURSELF.

- ❖ **Summary**
- ❖ Knee pain can be caused by a number of different things. Whatever the cause, exercise and keeping to a healthy weight can reduce symptoms.
- ❖ Try the exercises suggested here to help ease pain and prevent further damage.
