4.2.4 DISCRPTION OF COMMUNITY BASED TEACHING LEARNING ACTIVITIES

Narayana College of Nursing is focused on fostering and strengthening the relationship of the College with the community towards strengthening the individuals, families, and the community. Students are trained in the areas of family assessment and community assessment to identify the health problems of people living in the community. Students are further trained to make referrals for people identified to have problems and to give health education with an emphasis on primary prevention. Community Health Nursing Department is a hub for individuals, families, communities to proffer preventive, promotive, rehabilitative, curative aspects. Community health nurses make a difference to understand the needs of a society's inhabitants. The department has been conducting morbidity clinics at Venkatachalam since 2002 and observes all the National Health days by conducting Screening services, organizing camps based on the needs of the Community, and also performing various forms of health education programs. The department of Community Health Nursing has Core competencies in Providing need-based care to the individual, family, and community at adopted villages as Dakkilivaripalem and Saraswathi Nagar, every month conducting special programsfield of Community and also Coordinating with other departments of Narayana Medical college and hospitals, Narayana Dental hospital. The departmentprovides Comprehensive family-centered nursing care to the families, clients such as antenatal, postnatal's, newborns, children under five
