---

**STUDENT-CENTRIC METHODS ARE USED FOR ENHANCING  
LEARNING EXPERIENCES BY:**

1. Experiential learning
2. Integrated/ interdisciplinary learning
3. Participatory learning
4. Problem solving methodologies
5. Self-directed learning
6. Patient - centric and Evidenced Based Learning
7. Project – based learning
8. Role play

Student-centric methods in Nursing Education focus on engaging students actively in their learning process, fostering critical thinking, and promoting practical skills.

*Dr. B. Princy*  
Principal

**NARAYANA COLLEGE OF NURSING**  
Chinthareddypalem,

## 1. Experiential Learning

For experiential learning, students are taking for field visits to different areas related to the subjects, to obtain first hand information by observing places, objects and processes in their natural setting. Students are allowed to utilize labs to provide real life situations for first hand information and to supplement class room instructions. Students are getting training on first-aid to upgrade them in skill training. Students are getting opportunity to practice by implementing their knowledge and skill gained in classrooms and labs.

Health Education on Nutritional diet

website: <https://www.narayanannursingcollege.com>

## 2. Integrated/ interdisciplinary learning:

The students have been given learning experience in other discipline like anatomy and physiology etc. have been experience in Interprofessional learning. Integration of interdisciplinary has the potential to enrich nursing education by bringing in a depth of specialized knowledge from other disciplines. This method is considered as the best method to prepare nurses for team-based patient care which is an imperative skill in today's health care arena. To remove the barriers in learning the other disciples of medicine, interdisciplinary learning is encouraged in many ways like posting the students in dental hospital and including students in Institutional Innovation Council (IIC) committee where other disciple students also as a part.

Students participated in School Healthy Programme

website: <https://www.narayanannursingcollege.com>

### 3. Participatory learning:

These include Case studies in which the students posted in clinical wards select patients start giving nursing care from admission till the discharge by comparing book picture with patient picture. Students can learn in detail about Etiology, Pathophysiology, clinical features, diagnostic evaluation and management. Another method is Clinical presentation in which Students select a patient with interesting or rare disease condition and present in front of peer and the clinical faculty.

**Students Participated on Value Added Course**

*Dr. B. Anuraj*

e-mail: narayana\_nursing@yahoo.co.in || principal.ncn@narayanannursingcollege.com

website: <https://www.narayanannursingcollege.com>

## 4. Problem solving methodologies:

During the clinical posting, students are encouraged to select patient and present about each individual patient's complaints, investigation, diagnosis, management and most importantly problems and needs of the patients which will help as guideline for Nursing care and students engaging research activities.

Explaining about CBT techniques

website: <https://www.narayanannursingcollege.com>

## 5. Self directed learning:

Self – directed learning includes Assignment in each subject, which students have to write and submit by referring various books, groupdiscussion which is an exchange of ideas and getting expertise in subjects. Students are encouraged to attend study hours which are supervised by the faculty.

**Presenting Seminars**

## 6. Patient - centric and Evidenced Based Learning:

These includes Case studies in which the students posted in clinical wards select patient start giving nursing care from admission till the discharge by comparing book picture with patient picture. Students can learn in detail about etiology, Pathophysiology, clinical features, diagnostic evaluation and management. Clinical demonstration: in which Students learn by demonstrating a nursing procedure in front of peer and the clinical faculty.

Student Nurses monitoring the ECG

## 7. Project – based learning:

In this student work in small groups to increase knowledge by identifying learning objectives, engaging in self-directed work and participating in discussion. It provides students with greater access to information, support, resources, flexible approaches to learning, collaborative learning activities and opportunities for self-development.

## Students done Research Projects
