M.Sc Nursing program specific outcomes

1. Apply Nursing Science

- Demonstrate the ability to integrate nursing theories and models in clinical practice.
- Apply principles of nursing science to assess, diagnose, and treat health conditions.
- Evaluate the outcomes of nursing interventions based on scientific evidence.

2. Advanced Clinical Competence

- Exhibit proficiency in advanced nursing procedures and interventions.
- Use critical thinking to make informed clinical decisions in complex health scenarios.
- Evaluate the effectiveness of clinical practices and adapt them to improve patient care.

3. Specialized Practice

- Develop expertise in a specialized area of nursing, such as critical care, pediatrics, or mental health.
- Provide high-quality, evidence-based care within the chosen specialty.
- Mentor junior nurses in specialized techniques and protocols.

4. Leadership and Management

- Demonstrate effective communication and interpersonal skills as a leader within healthcare teams.
- Implement management strategies to optimize nursing care resources and staff.
- Conduct training sessions to develop nursing staff skills and knowledge.

5. Research Skills

- Identify research gaps in nursing practice and formulate relevant research questions.
- Use appropriate methodologies to conduct and analyze nursing research.
- Translate research findings into practice to enhance nursing care quality.

6. Change Management
