Prof. Smitha from Narayana College of Nursing & one for Critical care Nursing for Prof. Angela, Jubili Mission College of Nursing, Trichur, Kerala). There was a presentation session by the Invitees and Awardees later on.

Before Scientific Paper presentation thy stressed that ISSN Awards is an indicator of success that enhances the reputation and improves the benchmark of researchers and professionals from various fields. ISSN Awards is a matter of pride and motivation that raises the visibility of success. The Certificate, Memento, and Photograph will be a testimony. Further, this recognition is additional proof of hard work and achievements that must be globally accessible for researchers and hence will be available online 24/7. Also, this kind of sharing information is professional and will increase credibility. Hence we create an Exclusive Webpage for the Winner.

GEOGRAPHIC DISTRIBUTION

On January 11, the first case was reported outside mainland China in Thailand, and within months, the disease spread to all the continents except Antarctica. **India reported its first case of COVID-19 on January 30, 2020.** This rose to three cases by February 3, 2020. By mid-March, the number of infected cases started to increase, and many cases were reported from all over India. The first COVID-19 related death in India was reported on March 12, 2020. By the second week of April, the disease spread to all states in India.

GENETIC FACTORS

ACE2 and TMPRSS2 polymorphisms have been shown to be strongly associated with susceptibility, severity, and clinical outcomes. Genetic factors may also explain why males are at higher risk of infection and poor outcomes. A novel susceptibility locus has been detected at a chromosome 3p21.31 gene cluster in patients with respiratory failure, which may confirm the involvement of the ABO blood-group system.

Dr. Ramesh Prasath Mahatam Rai neglected tropical diseases in the context of covid-19 clearly expressed how the covid -19 pandemic has impacted neglected tropical diseases activities. He explained clearly NTD activities can be adapted to ensure safe implementation in the context of the Covid -19 pandemic.

Strategic Preparedness and Response Plan for COVID-19 as a communicable NTD

- a) Suppress transmission
- b) Reduce exposure
- c) Empower communities
- d) Counter misinformation and disinformation
- e) Protect the vulnerable through vaccination
- f) Reduce mortality and morbidity from all causes

(Ministry of Health Malaysia, 2020; World Health Organization, 2021b)

Maintaining essential health services: operational guidance for the COVID-19 context

- Adjust governance and coordination mechanisms to support timely action
- Prioritize essential health services and adapt to changing contexts and needs
- Optimize service delivery settings and platforms
- Establish safe and effective patient flow at all levels (screening, triage, and targeted referral)
- Rapidly optimize health workforce capacity
- Maintain the availability of essential medications, equipment and supplies
- Fund public health and remove financial barriers to access
- Strengthen communication strategies to support the appropriate use of essential services
- Use digital platforms to support essential health service delivery

(World Health Organization, 2021b; World Health Organization, 2021c)

Prof. V. Jayanthi elaborated the role of nurse-led clinic in post covid sequelae services in different population, key challenges faced by nursing profession during covid-19, includes preventing staffing shortages and providing psychological and social support to the nurses, essential criteria for NLC.

Long-term organ damage in COVID-19 [Multiorgan dysfunction]

Severe acute respiratory syndrome corona virus 2 (SARS-CoV-2) infection triggers long-lasting changes in the immune system, it primarily affects the lungs.

Conditions associated with long COVID-19 may be the result of injury to multiple organs, including the lungs, brain, blood vessels, skin, nerves, kidney and heart.

This can be seen as metabolic, musculoskeletal, cardiovascular, and neurological complications secondary to the disease.

Organ damage may increase the risk of long-term health issues.

Organ damage may increase the risk of long-term health issues. As per recent data COVID-19 mainly affect these organs and body parts:

Types of nurse led clinics and services

Generic e.g. frailty clinics, falls clinics, intermeuiate care, long term conditions in primary care Specific e.g. diabetes, chronic heart failure Follow up e.g. post operative, prostatectomy Diagnostic e.g. endoscopy

Prof.A.Viji discussed about actual vs optimal health habits of clients with covid-19. She explained clearly optimum health habits, WHO guide lines for balanced diet and exercises, food handling practices etc.

Investigation for Pulmonary Sequelae among COVID Cases

Breathlessness

Out-Patient or Clinic

Diaphragm – instruct upright breathing

Breathing control

- Comfortable position, relaxed shoulder
- Hand on tummy & chest for pregnancy...
- Steady breaths in through the nose, feel tummy rise
- Relaxed breathing inhale through the nose and breathe out through the mouth.

Rectangular Breathing - Focus on extending the breathing-out. Blow as you go – the main effort is on the breathing-out usually for 10-16 yrs old

Fatigue – Slow down, break tasks down, regular short breaks as opposed to fewer prolonged breaks especially for pregnancies.

Other Hints and tips: cool wet cloths on cheeks and nose, fresh air, relaxation/mindfulness, encourage staying calm/controlling anxiety

Dr. Gopichandran gave a detailed explanation on covid -19 vaccine myths and facts. Which includes types and difference between covishield and covaxin, number of doses required, route, actions, benefits, contraindications, side effects etc

COVISHIELD	COVAXIN
<ul style="list-style-type: none"> • Produced by-oxford AstraZeneca in collaboration with the serum institute of India. • Known as AZD1222 globally • Uses a replication-deficient chimpanzee viral vector, based on a weakened version of a common cold virus, also called the Adenovirus • It contains the genetic material of the SARS-CoV-2 virus spike protein 	<ul style="list-style-type: none"> • Produced by Hyderabad based Bharat Biotech in collaboration with ICMR (Indian council of medical research) & National Institute of Virology. • It is an inactivated form of the novel coronavirus itself. The strain was isolated from an asymptomatic COVID-19 patient • The vaccine uses an inactivated form of the virus to produce an immune response

COVID-19 VACCINE Mythbusters

MYTH
Anyone with immediate or delayed allergic reaction to vaccines or injectable therapies can be vaccinated

FACT
This is incorrect. Persons with history of immediate or delayed allergic reaction to vaccines or injectable therapies should avoid getting vaccinated

OUTLINE...

- Define Post COVID
- Types of Post COVID Conditions
- Long COVID
- Multiorgan effects of COVID 19
- Challenges of Post COVID 19
- Rehabilitation
- AIMS of Rehabilitation
- Benefits of rehabilitation
- Misconception of rehabilitation
- Rehabilitation Team
- Areas of concern rehabilitation
- Pulmonary Rehabilitation
- Rehabilitation services changes due to COVID
- References

Rehabilitation Services-changes due to COVID:

Participants were encouraged to take active part in the discussion and Queries were cleared by the Experts. **Post-test** was conducted to assess the effectiveness of the Programme and the **Feedback** was also duly collected for evaluation.

Table 1: Frequency & percentage distribution of level of knowledge among participants regarding Webinar on “clinical sequelae of Covid -19 survival womb to tomb”
N= (517)

GRADE	PRE-TEST		POST-TEST	
	F	%	F	%
A+	0	0	320	62
A	0	0	110	21
B+	36	7	76	15
B	86	17	11	2
C	180	35	0	0
D	215	41	0	0
TOTAL	517	100	517	100

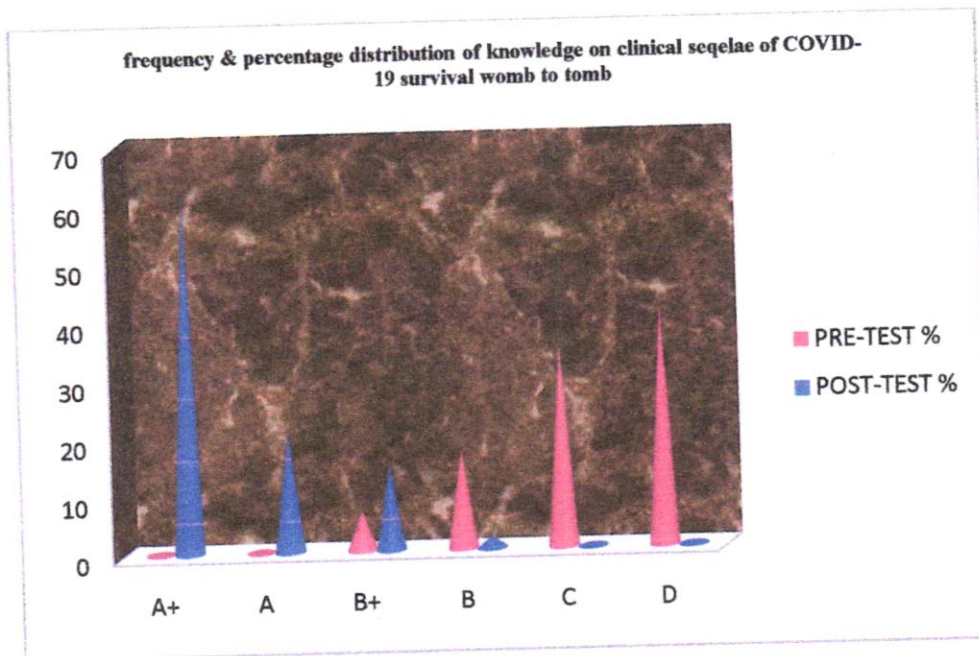

In relation to the level of knowledge on Webinar on “Clinical Sequelae of Covid - 19 survival womb to tomb among participants, the pre- test results show that 36(7%) participants scored B+ grade, 86(17%) participants scored “B” grade, 180

CLINICAL SEQUELAE OF COVID-19 SURVIVAL: WOMB TO TOMB
14th & 15th July 2021 | 09:00 am - 05:00 pm

Day-1: 14th July 2021

Time	Topic	Resource persons
09:00 - 09:45 am	Inauguration, Keynote Address	Dr. Indira. A Principal, Narayana College of Nursing, Nellore, A.P., India.
09:45 - 10:45 am	Variants of corona virus in recent past.	Dr. Surya Prakash Rao, MD Dean, Narayana Medical College & Hospital, Nellore, A.P., India.
10:45 - 11:00 am 11:00 - 12:00 pm	Tea Break Nurses "Burnout" as frontline health workers during Covid - 19 pandemic.	Datuk Dr. Hajjah Bibi Florina Abdulah, Pro-Chancellor, Lincoln University College, Malaysia
12:00 - 01:00 pm	Paternal role on pregnancy with covid - 19.	Ms. G. Aruna Associate Professor, Ph.D Scholar, Lincoln University College, Malaysia. Sree Narayana Nursing College, Nellore, A.P., India.
01:00 - 01:45 pm 01:45 - 02:45 pm	Lunch Break Role of vaccines in reducing corona virus transmission and consequences.	Dr. Prema Balusamy, Ph.D (N) Associate Professor, Applied Medical Sciences University of Hafz Al Batin Kingdom of Saudi Arabia.
02:45 - 03:45 pm	Covid - 19 outcomes of postmenopausal women.	Prof. Smitha PM Ph.D Scholar, Lincoln University College, Malaysia. Narayana College of Nursing, Nellore, A.P., India.
03:45 - 04:00 pm 04:00 - 05:00 pm	Tea Break Clients on regular hemodialysis with covid - 19.	Prof. A. Latha Ph.D Scholar, NTR University, Vijayawada. Narayana College of Nursing, Nellore, A.P., India.

Day-2: 15th July 2021

09:00 - 10:00 am	Nursing strategies to achieve 100% vaccination among public.	Dr. Srinivas Gandhi Prof. Cum Principal, Institute of Nursing Science, Agartala, Tripura, India.
10:00 - 11:00 am	Impact of Covid - 19 and the significance of learning management system in nursing education.	Dr. V. Mayilvaganan Asst. Director of Nursing, Dept. of Mental Health, Health service executive Dublin, Ireland.
11:00 - 11:15 am 11:15 - 12:15 pm	Tea Break Perception & practice on covid - 19 among lactating women.	Ms. T. Usha Kiran Associate Professor, Ph.D Scholar, Lincoln University College, Malaysia. Narayana College of Nursing, Nellore, A.P., India.
12:15 - 01:15 pm	Treatment of early stages of Covid - 19 among Diabetic population.	Prof. V. Rupa Saritha Reddy Ph.D Scholar, NTR University, Vijayawada. Sahaya College of Nursing, Tirupati, A.P., India.
01:15 - 02:15 pm 02:15 - 03:15 pm	Lunch Break Post covid - 19 sequelae among diabetic clients.	Prof. V. Aruna Kumari Ph.D Scholar, NTR University, Vijayawada. St. Anns College of Nursing, Vijayawada, A.P., India.
03:15 - 04:15 pm	Management of client with oral cancer during Covid - 19 pandemic.	Ms. Vijaya Thulasi Associate Professor, Ph.D Scholar, NTR University, Vijayawada. Dr. C. Sobhanadri Siddhartha College of Nursing, Chinnouvtipalli, Vijayawada, A.P., India.
04:15 - 04:30 pm 04:30 - 05:00 pm	Tea Break Validictory - Vote of Thanks	Prof. A. Viji Ph.D Scholar, Lincoln University College, Malaysia. Narayana College of Nursing, Nellore, A.P., India.

symptoms ,stress management, yoga and meditation relevant for menopausal women with Covid -19.

Prof.Latha.A ,Narayana College of Nursing ,Nellore clearly discussed about Clients on regular Haemodialysis with covid -19 Pandemic . She addressed the impact of covid 19 on clients with haemodialysis and measures to overcome the dreadful situation of Covid -19 .

Day :2- 15/7/2021

Prof.Viji .A Narayana college of Nursing, Nellore, welcomed the resource person and all participants and recapped the previous day sessions.

Dr Srinivasan Gandhi, Msc (N), Principal, Institute of Nursing Science, Tripura presented a topic on Nursing strategies to achieve 100% vaccination among public. He explained about phases of clinical trials and nursing action , strategies for mitigating post Covid vaccination absenteeism and nursing strategies for monitoring vaccine safety.

Dr. Mayilvaganan Veerasamy,PhD(N).Asst.Director of Nursing, Dublin, Ireland, explained about Impact of Covid -19 and the significance of LMS in Nursing education. He explained about deferral of teaching and learning assessment , professional and clinical placements, other work placements and traineeships, i.e. TMVA, BLS etc. Online education is strategic priority at every Institution to enhance the learning of nursing education.

Ms.Ushakiran .T Asso prof,MSc(N), Narayana College of Nursing ,Nellore clearly discussed about Perception and practice on COVID -19 among Lactating women She mentioned general guidelines to be followed by the lactating mother with Covid -19.

Dr. B. D. Dey
Principal

NARAYANA COLLEGE OF NURSING
Chinthareddypalem,
NELLORE - 524 003

V. A. Jase
Principal
NARAYANA COLLEGE OF NURSING
Chinthareddypalem,

Cannabis
Smoking cannabis has also been linked to an increased risk of mouth cancer. People who smoke cannabis may have a higher risk than tobacco smokers because cannabis smoke contains higher levels of tar than tobacco smoke, and tar is carcinogenic.

Human papilloma virus (HPV)
The human papilloma virus (HPV) is the name of a family of viruses that affect the skin and most mucous membranes that line your body, such as those in your cervix, anus, mouth and throat. Infection with some types of HPV can cause abnormal tissue growth and other changes to the cells, which can lead to the development of cancer.

Thank you

The WHO recommends breastfeeding for all mothers irrespective of their COVID-19 status

UNICEF

About these COVID-19 mRNA vaccines

- At least 8 weeks of safety data were gathered after participants received their 2nd dose in the trial. It is unusual for side effects to appear more than 8 weeks after vaccination.
- These vaccines produce common side effects after vaccination, especially after the 2nd dose.
 - Side effects may include:
 - Fever
 - Headache
 - Muscle aches
- No significant safety concerns were identified in the clinical trials, although a small number of severe allergic reactions have been reported during the initial phases of rollout.

As with any vaccine, vaccination should be followed with monitoring for immediate and delayed reactions, including allergies, and be vigilant in finding these events at the time of vaccine administration. Providers should have a plan in place to access emergency medical services immediately in the event of a severe allergic reaction.

Guidance on the use of oral glucose lowering agents (Oral GLAs)

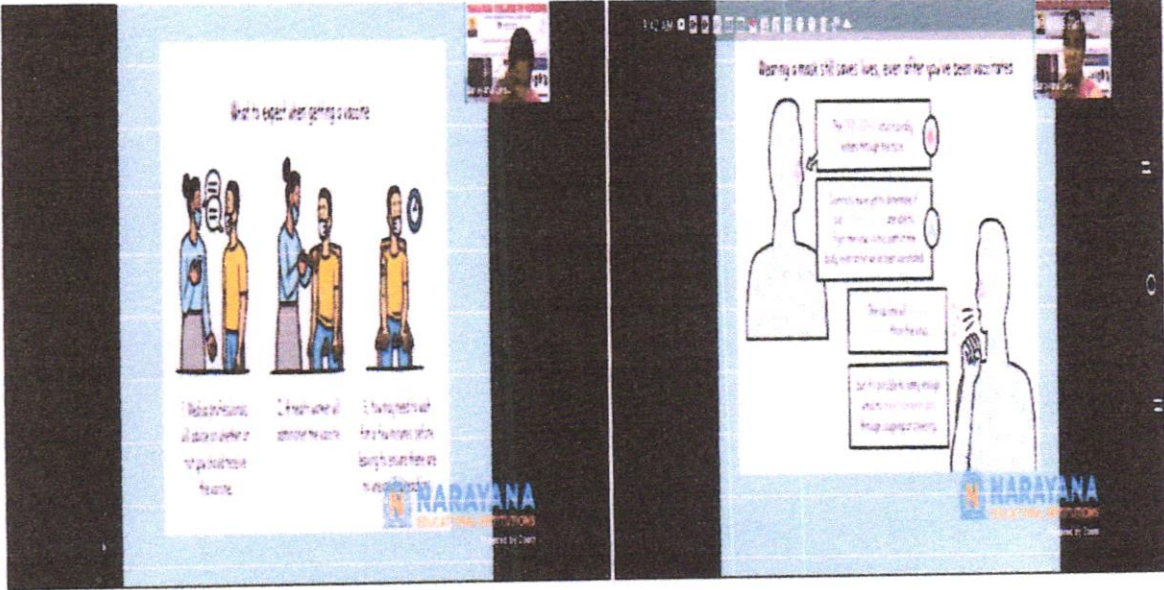

Medicine Class	Caution	Key Clinical Alerts to watch for
SGLT2 inhibitors Dapagliflozin Empagliflozin Canagliflozin	Metformin Risk of lactic acidosis increases in patients with renal impairment, liver failure, heart failure.	SGLT2 inhibitors Increase risk of genital and urinary tract infections.
Insulinomas Risk of hypoglycaemia increases with parenteral administration of insulin therapy.	Perfluorane Risk of hypoglycaemia increases with parenteral administration of insulin therapy.

demystifying effects of covid-19. understand the parenting in covid-19 . clarify potential impact on post Covid syndrome and strengthen the post Covid rehabilitation to community. Totally 508 participants were registered in this webinar.

Dr. Indira.A Principal, organizing chair person, welcomed the resource person and all participants .

Day :1- 18/8/2021

Dr. Indira .A, Principal, organizing chair person, welcomed the resource person and all participants and presented introduction about post Sequelae of Covid -19 .She explained in detail all co existing conditions and current statistics about Covid-19 in and around the world.

Dr. B.Valli . DD (Nursing) Registrar APNMC, Vijayawada, A.P., presented a topic on Nurse as a frontline health worker in post covid rehabilitation. She explained about rehabilitation interventions , purpose , consequences , complications of rehabilitation and preventive measures.

The consequences of COVID-19

Long term ventilation

Immobilization

Deconditioning

Related impairments – respiratory, neurological, musculoskeletal

COVID-19 patients will often present with pre-existing comorbidities and this must be taken into consideration in the rehabilitation plan for the patient.

OBSERVE FOR CVA SYMPTOMS

How to Spot a Stroke

Dr . Sujayalakshmi Devarayasamudram Ph.D, M.Phil,MSN,RN,ACUE North Carolina cenral university, Durham , NC, USA clearly discussed about Accelerated economic down turn in health care during pandemic. she explained the relationship between economy and health care share their personal action plan how to support and maintain their personal economy and maintain optimal health and discuss how to take up community projects to support in maintaining economy and optimal health.

"Health outcomes are based on health and economic policies"

Dr. Kumari .V , HOD of OBG dept. Narayana College Of Nursing, Nellore. A.P. Potential impact of covid 19 on reproductive health, she discusses about potential risks of vertical transmission. she explained about distribution of covid -19 between sexes and Potential of sexual transmission and impacts on sexual behavior, Changes in sexual behavior, Impacts of covid-19 on gonad functions ovary and testis functions.

Risk to maternal health at pregnancy

- Two cross-sectional studies have shown that the symptoms of COVID-19 infection during early pregnancy are not more severe than those among non-pregnant women (Li et al., 2020).
- But some infected pregnant patients have suffered very serious respiratory symptoms, most of them gave birth immediately after the expression of these severe symptoms, whether premature or at full term.
- In addition, adverse outcomes regarding the health of newborn infants have been reported; however, enough is not yet known about whether these outcomes were related directly to COVID-19 infection (Sugars et al. 2020).

Dr. C. Vasantha kalyani , Asso. Prof. AIIMS college of nursing, Rishikesh, explained Effects on education – school to university, what are the Approaches taken by various countries and institutions , The opportunity – infrastructure.

Applications of digital technology in COVID-19 pandemic planning and response

Digital Transformation

Schools (developed countries)

- Teachers engaged with their students using videoconferencing
- Gave students activities and projects to do
- Came back online to discuss progress (typically the next day)

However

- Assumption: adequate bandwidth at home
- Enough devices to cover all siblings if more than one
- Not always true

Ms. Saritha PJ, RN, Surgery trauma, orthopedic unit, London, U.K. , delivered about Myths Demystifying busters of Covid-19,.

MYTH: Hand sanitizers cannot be used often

Hand sanitizers can be used often

An alcohol-based sanitizer does not create antibiotic resistance. Unlike other antiseptics and antiseptics, sanitizers, alcohol-based sanitizers do not select for antibiotic resistance.

MYTH: Drinking alcohol help prevent Covid-19

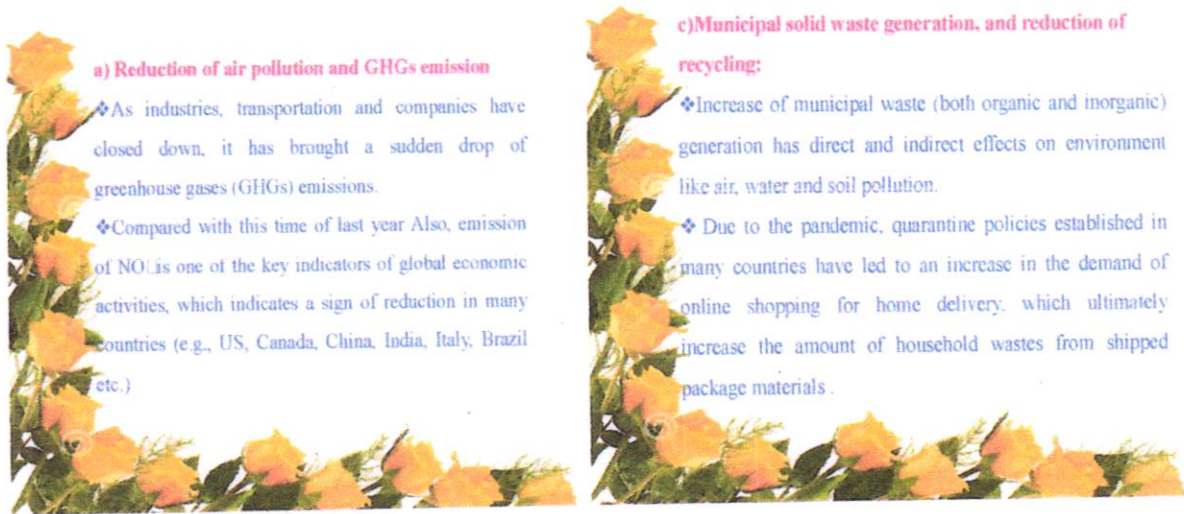

Drinking alcohol, such as beer, liquor, wine doesn't help prevent coronavirus. You should wash your hands often, wear masks, and avoid being close to those with a fever and cough.

Prof. B.Vanaja kumari, Narayana College of Nursing, Nellore clearly discussed about Covid-19 and its impact on environment. She elaborated positive environmental effects, GHGS mission, water pollution effects , ecological restoration , vegetation growth.

A. J. Reddy
Principal

Dr. B. Vanaja Kumari
Principal
NARAYANA COLLEGE OF NURSING
Chinthareddypalem,
NELLORE - 524 003

a) Reduction of air pollution and GHGs emission

- ❖ As industries, transportation and companies have closed down, it has brought a sudden drop of greenhouse gases (GHGs) emissions.
- ❖ Compared with this time of last year Also, emission of NO_x is one of the key indicators of global economic activities, which indicates a sign of reduction in many countries (e.g., US, Canada, China, India, Italy, Brazil etc.)

c)Municipal solid waste generation, and reduction of recycling:

- ❖ Increase of municipal waste (both organic and inorganic) generation has direct and indirect effects on environment like air, water and soil pollution.
- ❖ Due to the pandemic, quarantine policies established in many countries have led to an increase in the demand of online shopping for home delivery, which ultimately increase the amount of household wastes from shipped package materials.

Prof.B.Kalpna, Sree Narayana Nursing College ,Nellore delivered a topic on Community collaboration to combat Covid 19 . She delivered transmission of covid-19, global strategic objectives, prevention and control.

Transmission of COVID-19

Infection rate

The average number of people an ill person infects

*The average number of people an ill person infects (R0) is higher than the infection rate for seasonal flu and other respiratory viruses over the course of recent times.

The estimated R0 (Basic Reproduction Number) - the average number of secondary cases arising from a primary case in a susceptible population.

*Data from WHO, CDC, London School of Hygiene & Tropical Medicine and various other sources

Suppress community transmission through context-appropriate infection prevention and control measures, population level physical distancing measures, and appropriate and proportionate restrictions on non-essential domestic and international travel

Day :2- 19/8/2021

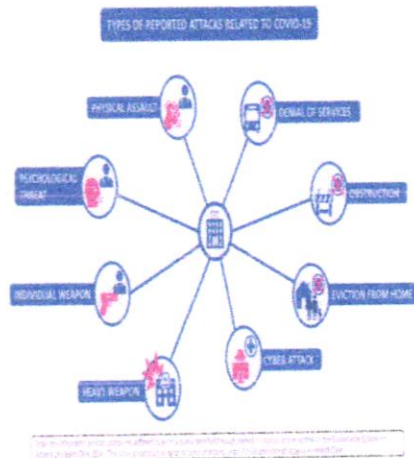

Asso. Prof. Aruna .G. Sree Nayana Nursing college, Nellore, welcomed the resource person and all participants and recapped the previous day sessions.

Dr. I. Clement, prof & HOD, Research & development, RV College of Nursing , jayanagar, Bangalore., explained about health care system in India, Impact of COVID-19 on the Indian healthcare sector, prevention of spread of infection, health insurances, policies etc. .

5. Research to Enhance Knowledge on COVID-19 Prevention and Management

The lived experiences, strategies, and policies related to confronting, exploring, and managing COVID-19 are important to healthcare professionals and nurses in preventing and managing future outbreaks of infectious diseases like COVID-19. In addition to basic and clinical studies, conducting studies on disease-spread prevention and the experience of supporting patients physically and psychologically will be crucial. Examining the effects of administrative strategies on disease-spread prevention in both healthcare and community settings will be valuable. Exploring the impact of cultural differences on the perception and prevention of COVID-19 will be one of the most significant issues related to the spread and management of COVID-19 across countries and cultures.

Prof. Shanmugavadivu, Narayana College of Nursing ,Nellore clearly discussed about parenting role with Covid -19 Pandemic .

How to talk to your child about COVID-19

- Be aware of your own attitudes (as children can pick up on these)
- Communicate from a place of calm - choose a safe plan and time to chat
- Ask what they know/have heard about COVID-19
- Ask how they are feeling and validate their feelings
- Invite questions
- Give simple and honest information, but also keep it as positive as possible
- Reassure and let them know about what is being done to help protect people
- Use this as an opportunity to learn together, e.g. you could watch a video or read a book on how our immune system works
- Give them things they can do, e.g. hygiene practices like hand washing, coughing etiquette, etc.

14. Parenting teens

Adolescents may be missing school, friends and their social life. It is important to provide them with extra support as well as the space to express themselves independently.

Spending time with your teen

- Plan creative ways to communicate with friends and family (e.g. writing messages or drawing pictures).
- Cook a favourite meal together.
- Exercise together to their favourite music.
- Talk about something they like: sports, music, celebrities, friends.

Talking about COVID-19

- Involve them in fact-finding and listen to their questions.
- Task them with exploring a topic and reporting back to the family from a radio programme, a newspaper article or the internet.

Sharing responsibilities

- Teens appreciate having extra responsibilities. Allow them to choose a special job that helps out.
- Create a time during the day where everyone shares one thing that they enjoyed.
- Share responsibilities equally amongst women/men and girls/boys.

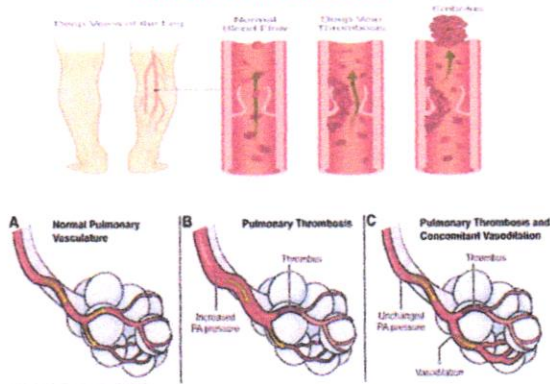

Mrs.N.Subhashini Msc (N), Narayana College of Nursing ,Nellore presented a topic on Bundle care therapy on thrombosis on covid-19 syndrome. She explained about thrombosis, risk factors, clinical consequences, diagnosis and management etc.

Dr. B. D. Devi
Principal
NARAYANA COLLEGE OF NURSING
Chinthareddypalem,
NELLORE - 524 003

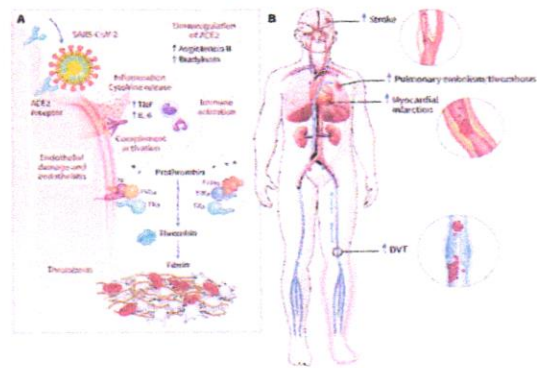

V. Jeeva
Principal
NARAYANA COLLEGE OF NURSING
Chinthareddypalem,
NELLORE - 524 003.

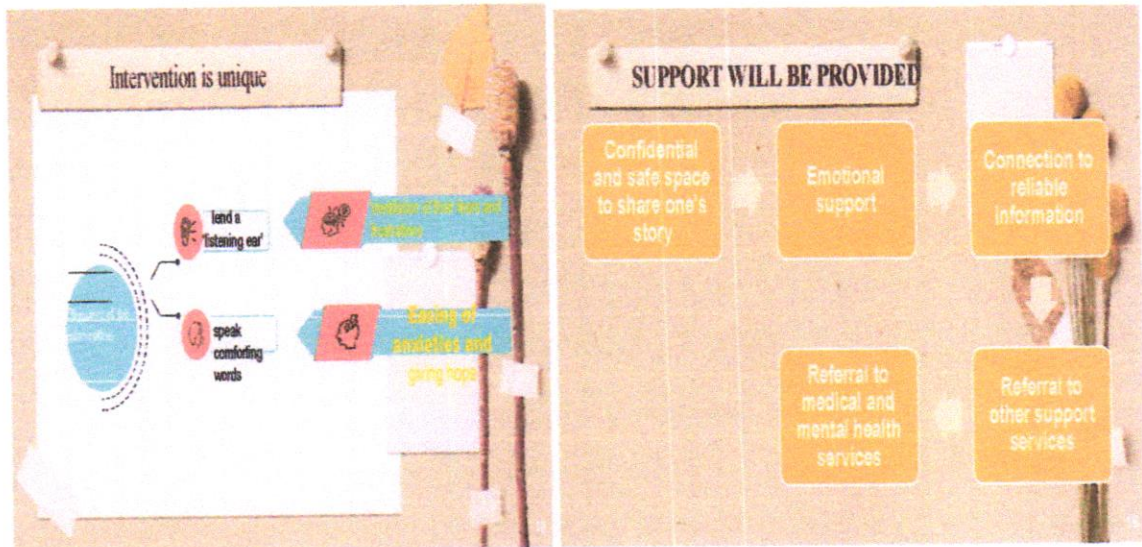

What is thrombosis ?

Possible mechanisms for thrombosis in coronavirus disease 2019 (COVID-19) and clinical consequences

Asst. Prof. N. Anjani Devi, Narayana College of Nursing, Nellore clearly discussed about need for psychological counseling , issues by patients, counseling skills etc.

Delegates from various parts of Nation contributed the 6 posters for its presentation, out of it 3 was freezed as best posters .Mrs.B.Bhanuparamjyothi,MLHP ,Ms.Prasanna lecturer,SPMVV CON and J.Anusha Assistant professor , Narayana College of Nursing, Nellore awarded as first and second and third prize consecutively.

Participants were encouraged to take active part in the discussion and Queries were cleared by the Experts. Post-test was conducted to assess the effectiveness of the Programme and the Feedback was also duly collected for evaluation.

Table 1: Frequency & percentage distribution of level of knowledge among participants regarding Webinar on “clinical sequelae of Covid -19 survival womb to tomb”

N= (508)

GRADE	PRE-TEST		POST-TEST	
	F	%	F	%
A+	0	0	315	62
A	0	0	113	22
B+	40	8	76	14
B	73	14	11	2
C	175	35	0	0
D	220	43	0	0
TOTAL	508	100	508	100

In relation to the level of knowledge on Webinar on “clinical Sequelae of Covid -19 survival womb to tomb among participants, the pre- test results show that 40(8%) participants scored B+ grade, 73(14%) participants scored “B” grade, 175 (35%) participants scored “C” grade, 220 (43%)scored “D” grade and no participants scored A+ and A .While in the post test, the knowledge level improved as 315 (62 %)participants scored “A+” grade, 113(22 %) participants scored “A” grade, 76(14%) participants scored B+ grade,11(2%) participants scored B grade and there was **no participants in C and D grades**. The results indicate that participants level of knowledge of Webinar on “Clinical Sequelae of Covid -19 survival womb to tomb has increased and participants has benefited from the programme

Glimpses at Breast self Examination demonstration and return demonstration:

CONCLUSION: The International workshop on pap smear and breast self examination demonstration concluded that there was a significant improvement of knowledge in post test as compared to the pre test. More participants had A+ grade than pre-test. **“workshop on pap smear and breast self examination”** was considered as very effective for improving skill among participants and also recommended for other nursing procedures in both classroom and clinical areas.

Day 2: 19.07.2019

9-10.30 AM: Inauguration of the Conference

The 2nd International conference inauguration was started with the Prayer song by II Year M.Sc(N) students, followed by the welcome song. All the delegates were welcomed with the welcome dance by IV year B.Sc(N) students. Mrs.Jayanthi V, Principal, Sree Narayana Nursing College has welcomed all the guest, and delegates for the conference. All the dignitaries on the Dias lighted the lamp. Dr.C.VRao, Vice Chancellor, Dr.NTRUHS briefed on the importance of the Oncology Nursing, integration of scientific discoveries in health care system, the essential component of education in prevention and treatment in oncology care. Dr.S. Radha Ramasree, Registrar, APMNC, special invitee highlighted on the preventive measures that need to be initiated in all areas and the important role of nurse in health care. Dr.B.Valli, Principal, Government College of Nursing, President, AP branch

DATA ANALYSIS & INTERPRETATION OF INTERNATIONAL WORKSHOP ON PAP SMEAR

TABLE :I FREQUENCY AND PERCENTAGE OF LEVEL OF KNOWLEDGE AMONG PARTICIPANTS ON PAP SMEAR

(N=243)

GRADES IN LEVEL OF KNOWLEDGE	PRE-TEST		POST TEST	
	FREQUENCY	PERCENTAGE	FREQUENCY	PERCENTAGE
A+	3	1	82	34
A	21	9	73	30
B+	35	14	67	27
B	58	24	21	9
C	23	10	0	0
D	103	42	0	0
TOTAL	243	100%	243	100%

FIG NO :I PERCENTAGE DISTRIBUTION OF LEVEL OF KNOWLEDGE AMONG PARTICIPANTS ON PAP SMEAR

The pretest result showed that, among 243 participants, 3(1%) had A+ Grade , 21(9%) had A Grade , 35(14%) obtained B+ Grade, 58(24%) had B Grade , 23(10%) had C Grade, and 103(42%) had D Grade knowledge, whereas in post-test 82(34%) had A+ Grade, 73(30%) had A Grade , 67(27%) had B+ Grade , 21(9%) had B grade and 0(0%) had C, D grade consecutively.
